

JUBILEE

Creek v4a3III★

Location

Off SH6, Haast Pass Area

Map

G38 Haast Pass
Canyon Starts @ NZMG

Character

Steep stream with many rappels. Intermittent canyon walls.

Access

This canyon is called Jubilee Creek on the Topo Maps, but the road bridge is signposted Canaans Creek. From the Gravel layby just south of the road bridge, gain 210m of elevation on the TR bank, before sidling into the creek. Take care in routefinding as there are numerous bluffs within the bush.

Rock

Blocky Schist

Water

Low to Moderate flows with little swimming

Catchment

2.8 km²

Anchors

All natural anchors

Gear

2 x 60m ropes, anchor kit

Route Description

The creek descends through many drops and has several sections of scrambling down the streamway. As the canyon walls are intermittent, many of the obstacles can be by passed if nessecary, though the by pass may involve steep bush climbing to get out of the watercourse.

Time

Carpark to Canyon start	1hr
Canyon descent	4hr
Total	5h

Flash Flood Danger

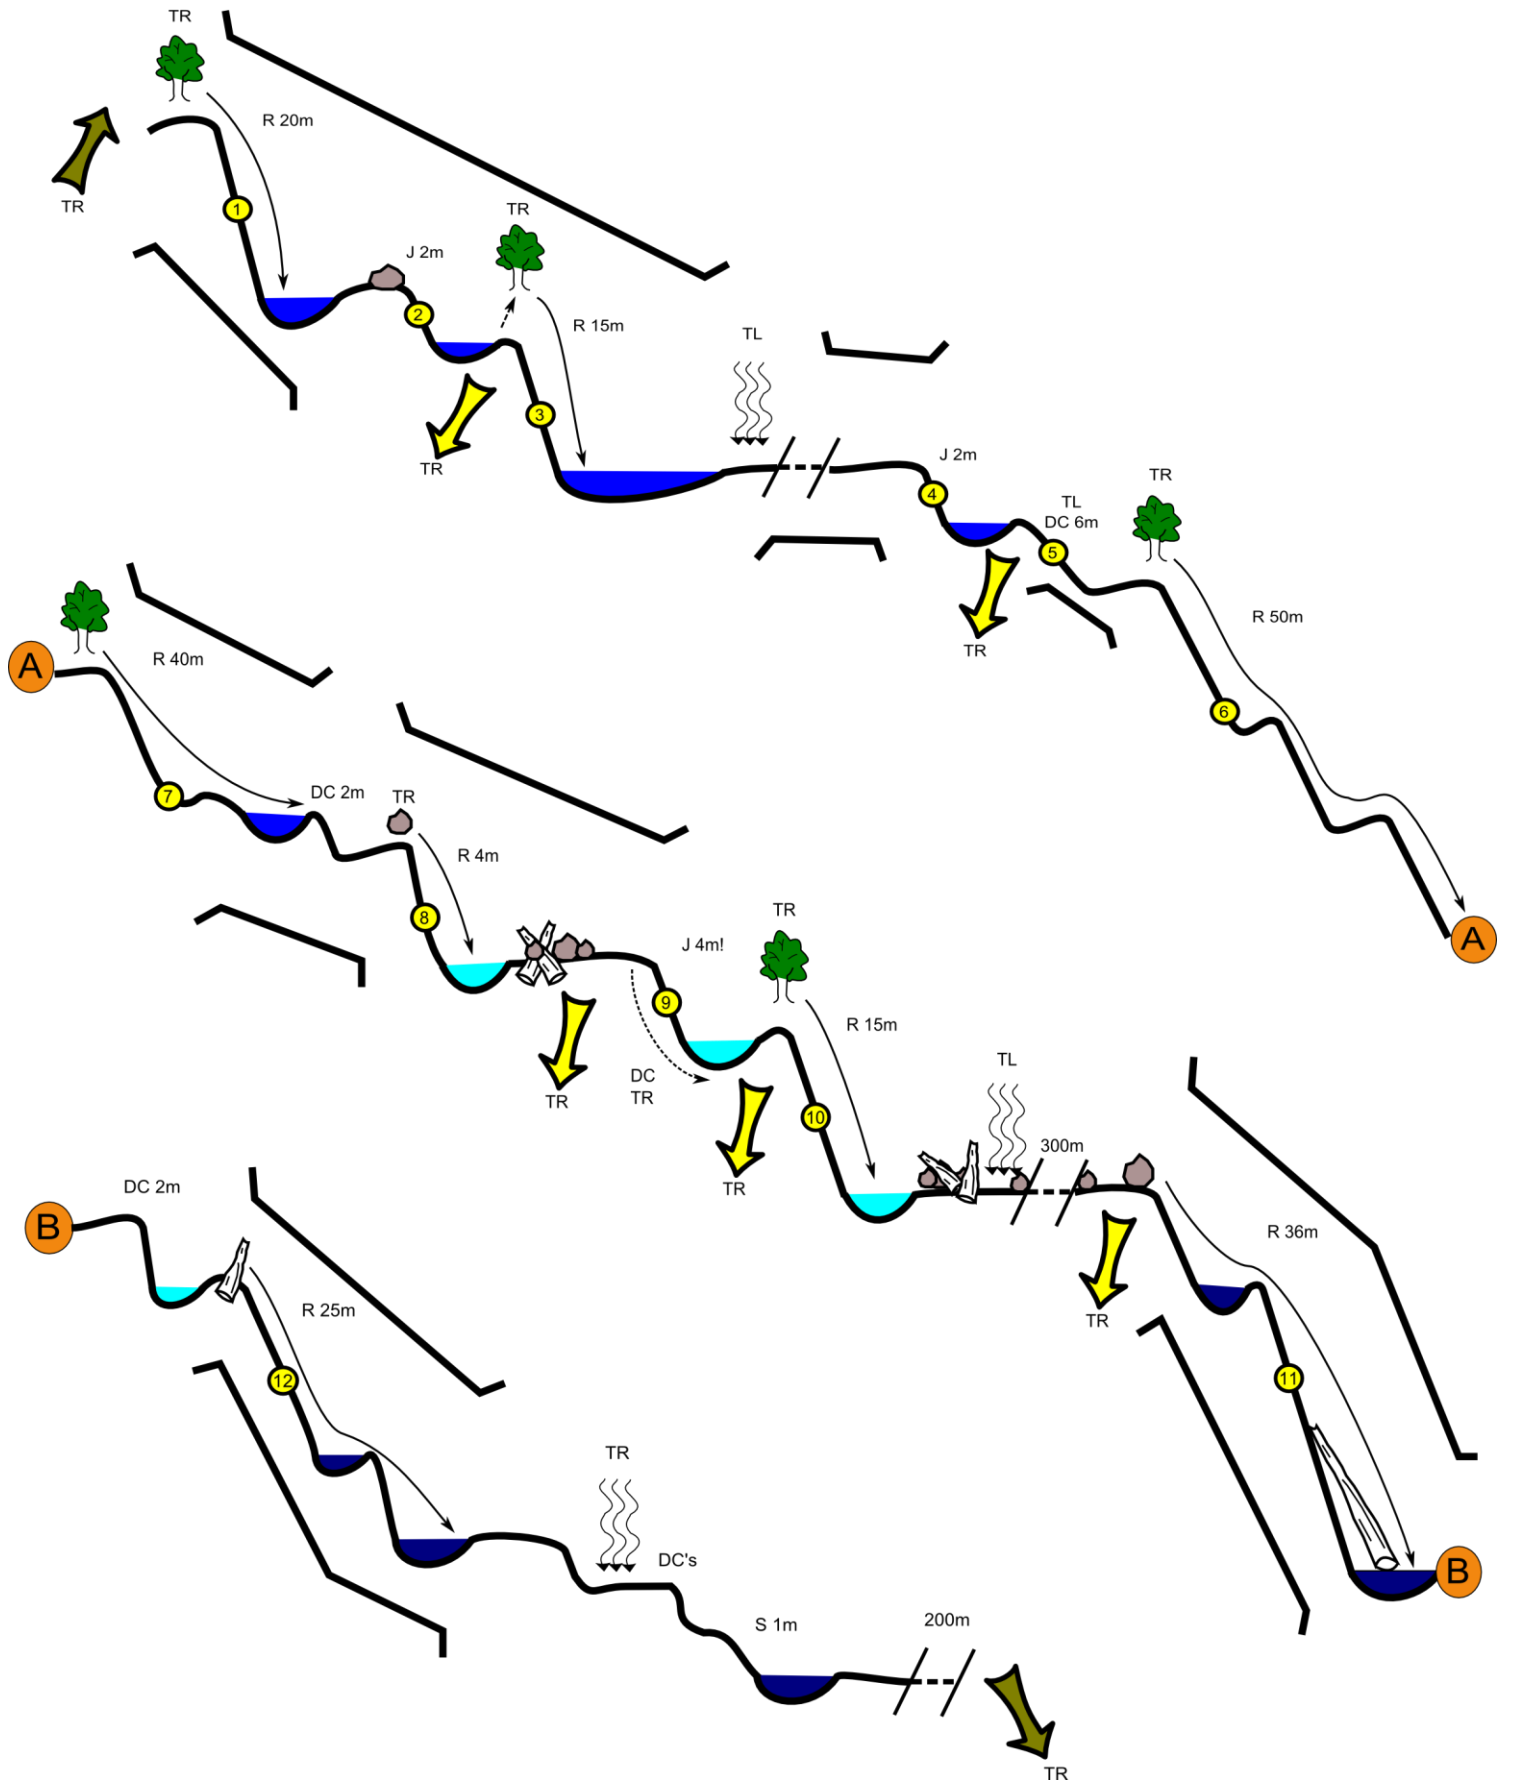

Low. Plenty of places to get out of the streamway.

Escapes

Main escapes are noted on the Topo, but the stream can be exited at many locations.

Notes

First descent:
Alain Rohr, Jethro Robinson et al 2008.
